Travel Brochure

The island provided Elmer Elevator with challenges that were met by his clever wit and well-supplied knapsack. He saw and experienced a world that he had never before seen. Imagine what Elmer might have told everyone in his town about the island.

Many people like to travel to islands and read travel brochures for recreational activities and places to stay and eat. For this activity, you will be working in small groups to create a travel brochure for Wild Island. From the suggested list below, choose a section that seems interesting to you and other members of your group, then present it to the class. Remember, you might think of other things to do and places to stay on Wild Island to include in your brochure. Be sure to include prices and information about the activities as well as any special equipment, including clothing that may be needed.

Plants	Animals	Land Features	Activities	Lodging
palm trees	tortoises	swamp	snorkeling	hotels
mahogany trees	boars	river	deep sea diving	tree houses
banyan trees	tigers	jungle	water skiing	beach bungalows
ferns	rhinoceroses	beach	hang gliding	thatched huts
wahoo bush	gorillas	ocean	swimming	over-water bungalows
tall grass	crocodiles	ocean rocks	hiking	

Animal Math

In this part of the story, Elmer walks across the crocodiles' backs to the other side. Just as he arrives on the opposite bank, he sees the other animals in pursuit. There were seven tigers, one rhinoceros, two lions, one gorilla, six monkeys, and two boars along with the seventeen very hungry crocodiles. Solve the following story problems using the animals previously mentioned.

1.	Using the list and number of animals previously mentioned, add the total number of animals on the backs of the crocodiles behind Elmer.
2.	If one crocodile weighs 1,125 pounds, how much will 9 crocodiles weigh?
3.	One tiger weighs 250 pounds. What is the total weight of four tigers?
4.	If the gorilla weighs 356 pounds and the rhinoceros weighs 2,160 pounds, what is their total weight?
5.	One of the crocodiles has a lion and a monkey on his back. The lion weighs 300 pounds and the monkey weighs 55 pounds. How much weight is on the crocodile's back?
6.	A lion can live for 24 years. A rhinoceros can live for 16 more years than a lion. How old can a rhinoceros live to be?
7.	Each of the 6 monkeys has 4 legs. How many legs are on the 6 monkeys altogether?
8.	If each of the 17 crocodiles is 12 feet long and they are stretched end to end across the wide and muddy river, how wide is the river?
9.	Elmer packed two-dozen pink lollipops. If he gave 17 of them to the crocodiles, how many did he have left?
10.	Elmer braided the lion's forelock, containing 21 strands of hair. If he divided them into groups of three, how many braids were formed in the lion's forelock?
